

It's about: understanding

EVERY WOMAN HAS THE RIGHT TO KNOW HOW HER CYCLES FUNCTION IN ORDER TO UNDERSTAND THE WAY HER BODY WORKS.

NaProTECHNOLOGY® is the first system to network family planning with reproductive and gynecologic health monitoring and maintenance. With this technology using the Creighton Model FertilityCare™ System (CrMS™), women can easily and objectively monitor several different biological markers, which are essential to understanding women's health and fertility. This not only allows a woman to monitor her health, but also allows couples to use this knowledge to plan their family and build their future as a couple! All this is done in just minutes each day of observation.

FREE INTRODUCTORY SESSION SCHEDULE

PLEASE CALL TO SCHEDULE A SESSION: (509) 542-3036 INDIVIDUAL INTRODUCTORY SESSIONS ARE ALSO AVAILABLE.
